DETAILED ACTION

Election/Restrictions

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

- 1) polymers of vinyl acetate; (claim 19)
- 2) polymers of crotonic acid; (claim 20)
- 3) copolymers of vinyl acetate and crotonic acid; (claim 14)
- 4) poly-vinyl acetate-co-vinyl alcohol (claim 18); and
- 5) mixtures of derivative polymers of vinyl acetate and crotonic acid (claims 21 and 22).

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims

are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The following claim(s) are generic: claims 14-17 are generic.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: the species have different structures. For example, crotonic acid is:

Art Unit: 1616

Vinyl acetate is:

Vinyl acetate	
	
IUPAC name	[show]
Systematic name	Ethenyl ethanoate
Other names	Acetic acid vinyl ester, acetoxyethene, VyAc, VAM, zeset T, VAM vinyl acetate monomer, acetic acid ethenyl ester, 1-acetoxyethylene
Identifiers	
CAS number	106-05-4 [show]

Vinyl alcohol is:

Ethenol	
	
IUPAC name	[show]
Identifiers	
CAS number	567-75-5
PubChem	11199
SMILES	[show]
InChI	[show]
ChemSpider ID	10726

Art Unit: 1616

Therefore, polymers of the monomers have different structures. For instance, polyvinyl alcohol has the structure:

And polyvinyl acetate has the structure:

Copolymers of the monomeric units would represent yet another distinct structure. Since no single structure can be termed the special technical feature then an election of species is deemed appropriate.

A telephone call was made to Philipp Adam on 9/29/09 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
